

SARIMA Time-Series Models

Capstone Project

Brian O'Donnell January 2023

Business Understanding

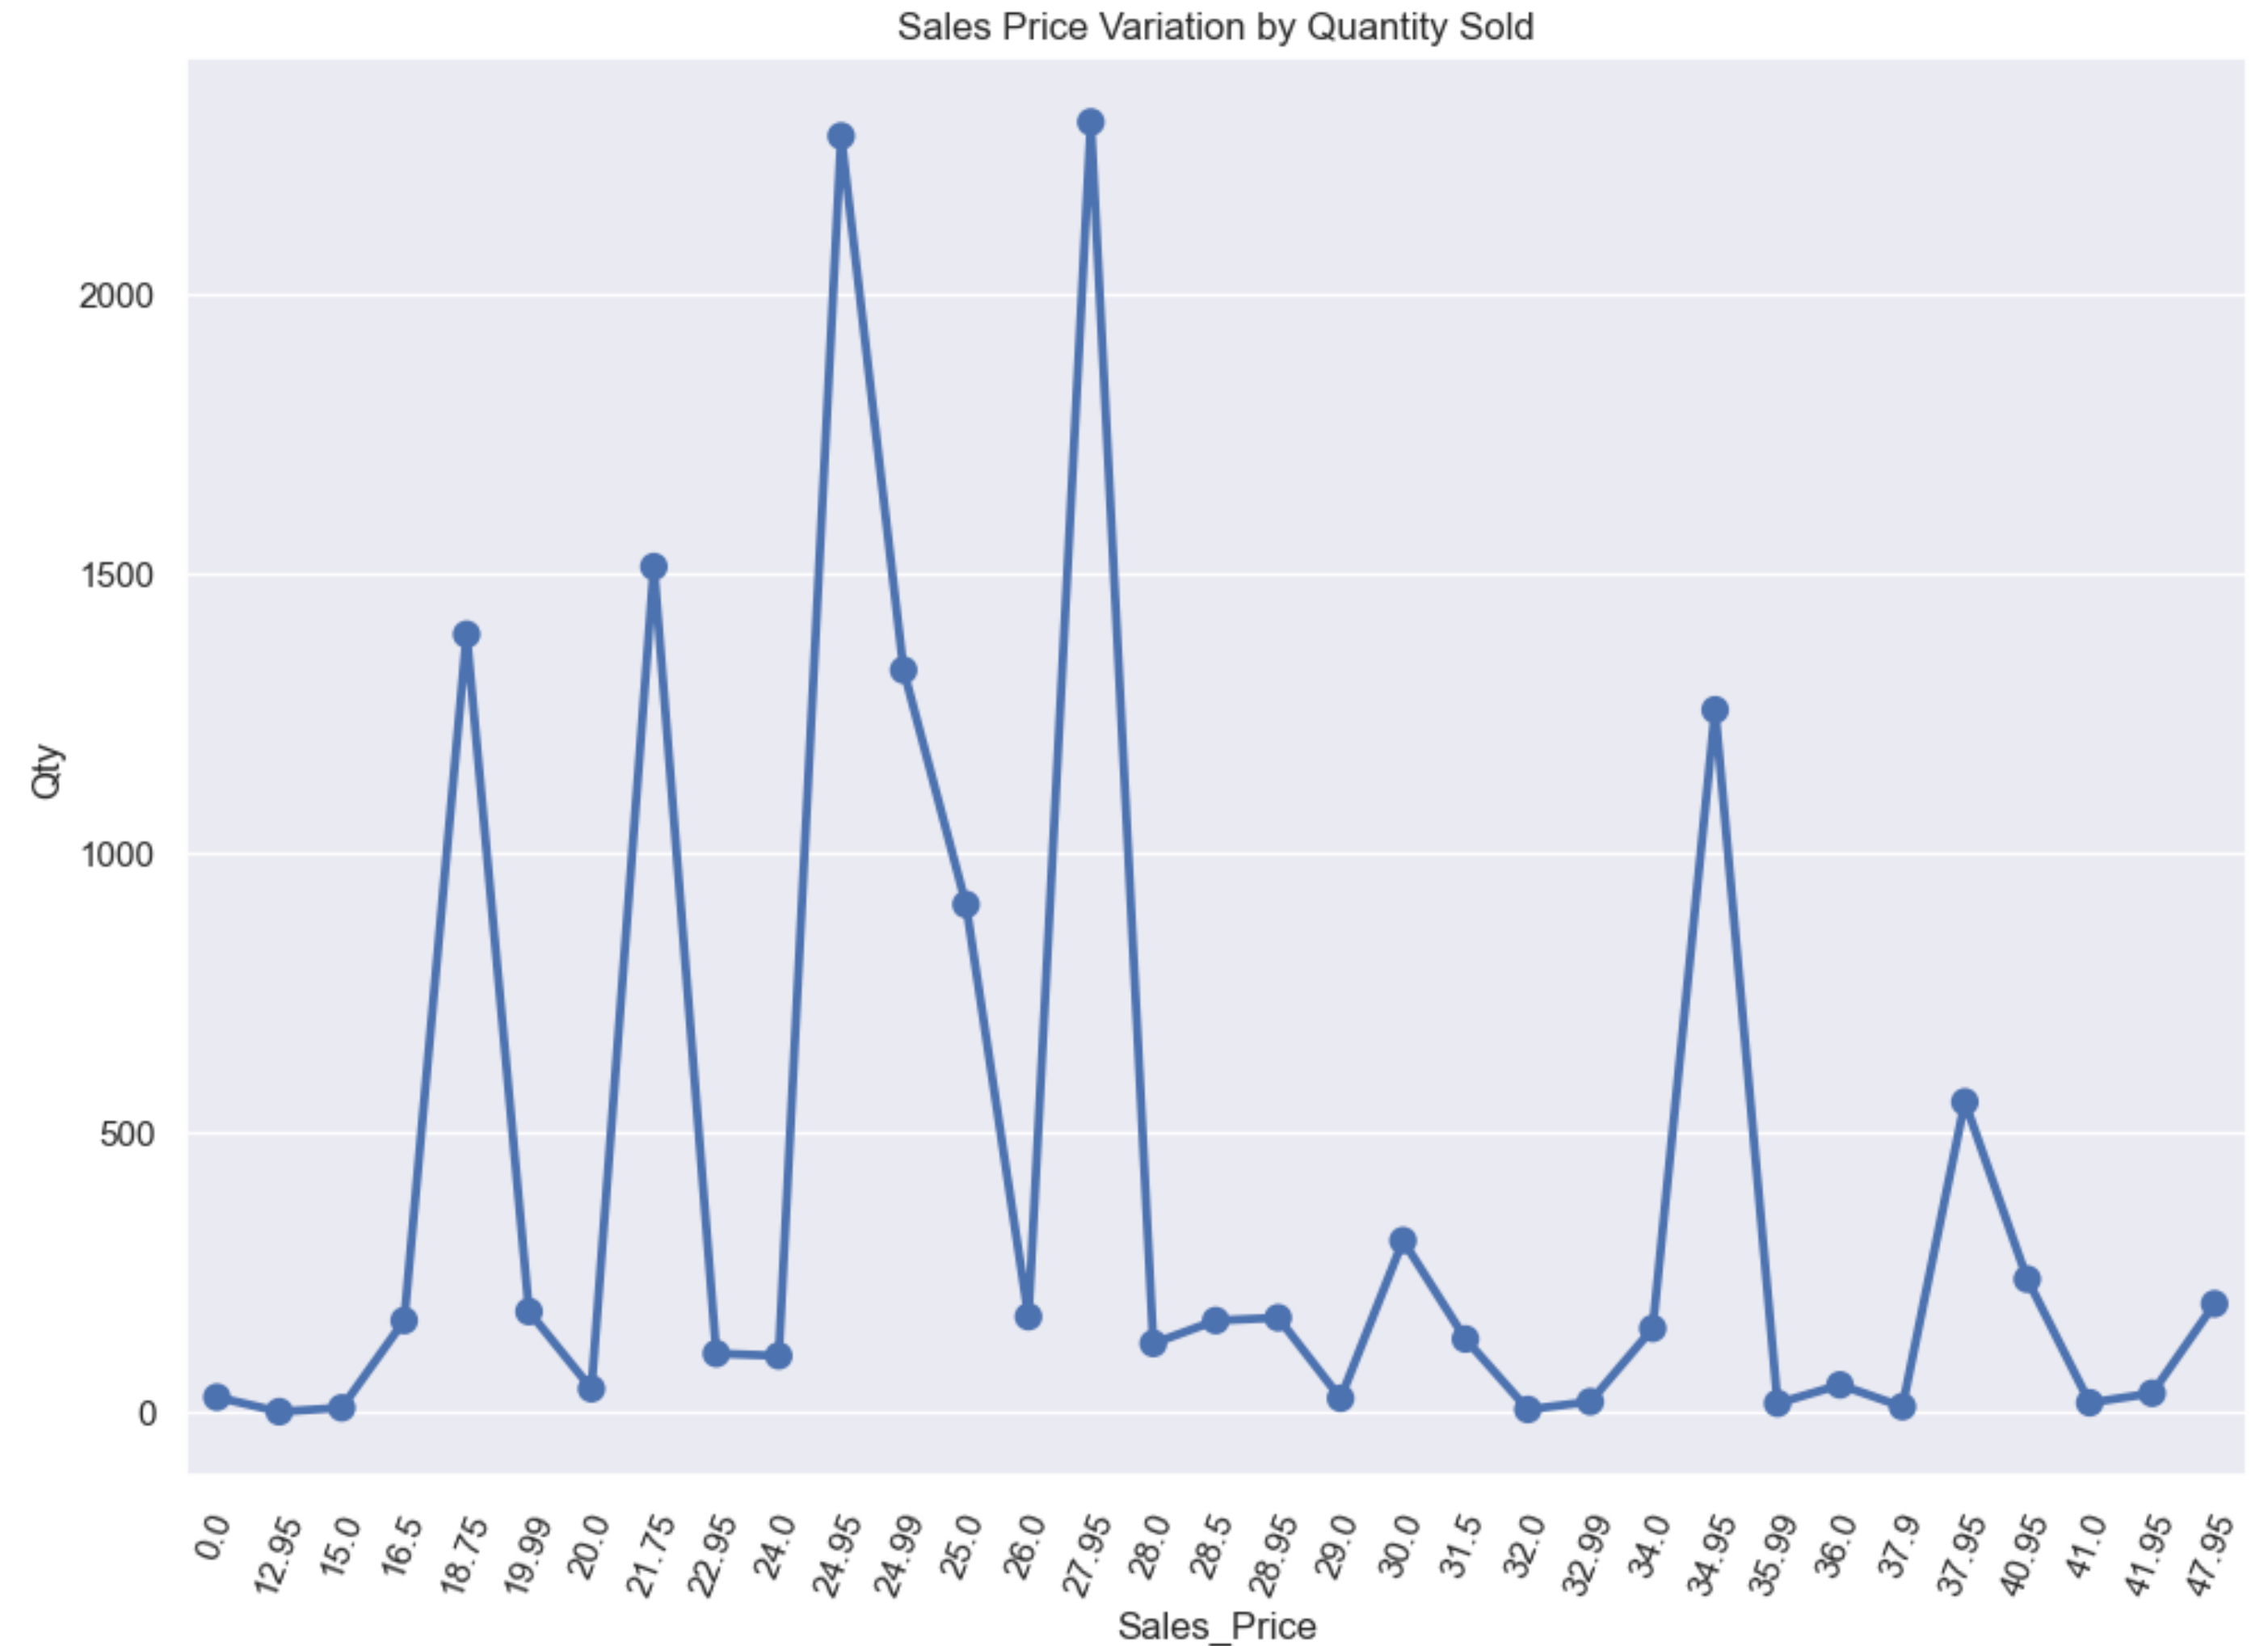

Client	Business Goal	Data
Fire Maul Tools	Solve Inventory Issue	5 Years worth of sales: -13,977 units sold -11 Color Options

Brian O'Donnell January 2023

Data Understanding

- Import Data from Business Owner with Permission
- Clean Data and look for Trends
- Inspect Historical Prices and Quantities Sold

Brian O'Donnell January 2023

Data Understanding

- Top 3 Sellers:
 - Black Grip Kits
 - Red Grip Kits
 - Blue Grip Kits
- Account for over 60% of sales

Brian O'Donnell January 2023

Data Preparation

- Create 3 Separate DataFrames for Each Top Selling Color
- Set Parameters For Each of the 3 DataFrames
- Run Each DataFrame through a SARIMA time-series model

Models

- To produce our SARIMA models the data was split into test/training sets
- The optimal parameters were then fitted to allow us to make predictions

Brian O'Donnell January 2023

Models

- Model Predictions For the Next Year by Week:

Black	Red	Blue
Qty: 2.377	Qty: 3.707	Qty: 2.365
CI Range: 8	CI Range: 8	CI Range: 9

Conclusions

Predictions for Fire Maul Tools:

Anticipate Sales On *High End* Of Confidence Intervals

Sales of **7-10** Units Per Top Color Each Week

Following These Predictions Can Solve Your Inventory Problem

Brian O'Donnell January 2023

Next Steps

- Continue to update sales sheet to keep track of trends and extend forecast
- Perform a time series on all grip kits as a single product
- Measure success of predicted quantities and confidence intervals

Thank You!
